

## Hydrant Flushing

**The Town of Erin Water Department maintains all watermains, hydrants and service connections within the Town of Erin.**

The Water Department undergoes the annual maintenance flushing of the hydrants in the early to mid spring, (weather permitting). Flushing of the hydrants will take place between the hours of 08:30 a.m. - 4:00 p.m., Monday through Friday. Notices will be posted on the website and in the Erin Advocate of the exact flushing dates.

When these maintenance activities are occurring in your area you may notice some discoloration of water from your taps, flushing toilets and doing laundry.

Upon completion of the flushing or valve operations in your area, we recommend that you run the cold water tap for a few minutes until discoloration disappears.

We thank you for your co-operation.

If you have any questions or concerns please contact the Water Department at 519-855-4407, extension 253 (Water Superintendent), extension 228 (Compliance Administrator) or 271 (Water Clerk, Billings & Inquiries).
