

Public Notice

Hydrant/Water System Flushing

On behalf of the Town of Erin, Ontario Clean Water Agency operators will be performing watermain flushing for the Erin Water System from May 17-21 for general maintenance of the water system.

Due to sedimentation, this flushing may cause temporary discolouration of the water. Residents are advised to check their cold water supply before use. If discolouration occurs, please let the cold water run until it is clear.

If you have any questions call 519.855.4407 or email CustomerService@Erin.ca.
