**Re: Proposed Residential Subdivision
63 and 63A Trafalgar Road (Wellington Road 24)
Town of Erin, County of Wellington
Transportation Study**

CGE Consulting is pleased to submit this Transportation Study for the above noted development. This report documents the transportation impacts and needs for the proposed residential subdivision Draft Plan of Subdivision situated on a parcel of land located on the east side of Trafalgar Road (Wellington Road 24), north of Wellington Road 22, in the Town of Erin, County of Wellington.

It is noted this is a scoped transportation study reflecting the early planning stages of the development of the Draft Plan of Subdivision and is being prepared in advance of the transportation functional design study and the draft plan approval.

Should you have any questions regarding this study, please do not hesitate to contact the undersigned.

Yours truly,

CGE TRANSPORTATION CONSULTING

1.0 INTRODUCTION

CGE Transportation Consulting was retained by Beachcroft Investments Inc. to prepare a Transportation Study for a proposed Draft Plan of Subdivision located on land located on the east side of Trafalgar Road (Wellington Road 24), north of Wellington Road 22, in the Town of Erin, County of Wellington.

Existing Site Description:

The site is bounded by Trafalgar Road (Wellington Road 24) to the east, the Barbour Fields to the west, residential developments to the north and vacant land to the south. The site is presently vacant and is currently zoned as a *Future Development (FD) Zone*.

The location of the proposed development is illustrated in **Figure 1**.

Development Proposal Description:

Based on the current version of the proposed Draft Plan of Subdivision, the proposal consists of 445 single-family detached units, 353 townhouse units and one heritage house on approximately 129 acres. A mixed-use block (Block 505) for future development has been proposed, but as discussed with the owner, the specific uses and timeline have not been determined. As a result, this block has not been included in the traffic study's analysis.

The proposed development features six external access connections. These include a connection to Wellington Road via Street "1", two connections to Trafalgar Road (Wellington Road 24) via Street "2" and Street "9", an access connection to Spruce Street via Street "3", an access connection to Currie Drive via Street "4" and an access connection to Market Street via Street "16".

The proposed Draft Plan of Subdivision is provided in **Figure 2**.

Scope of Work:

The purpose of this transportation study is to assess the effects of the development on the study area roadways, and evaluate the need for auxiliary lanes at the proposed project accesses from Trafalgar Road (Wellington Road 24) and Wellington Road 22.

As previously mentioned, the scope of this transportation study aligns with the preliminary planning stages of the Draft Plan of Subdivision. It has been developed in anticipation of the transportation functional design study and the draft plan approval.

The study area includes the following intersections, due to the expected low traffic volumes at the Spruce Street and Currie Street access points, these accesses were not included in the analysis.

- Wellington Road 22 & Trafalgar Road (Wellington Road 24)
- Wellington Road 22 & East Collector Road/Street “1”
- Trafalgar Road (Wellington Road 24) & Station Street/ Street “2”
- Trafalgar Road (Wellington Road 24) & Street “9”
- Trafalgar Road (Wellington Road 24) & Market Street/ Street “16”

The study analyzed the following scenarios:

- Existing 2023 Conditions
- Future Background 2031 Conditions
- Full Build 2031 Conditions
- Future Year 2036 Conditions

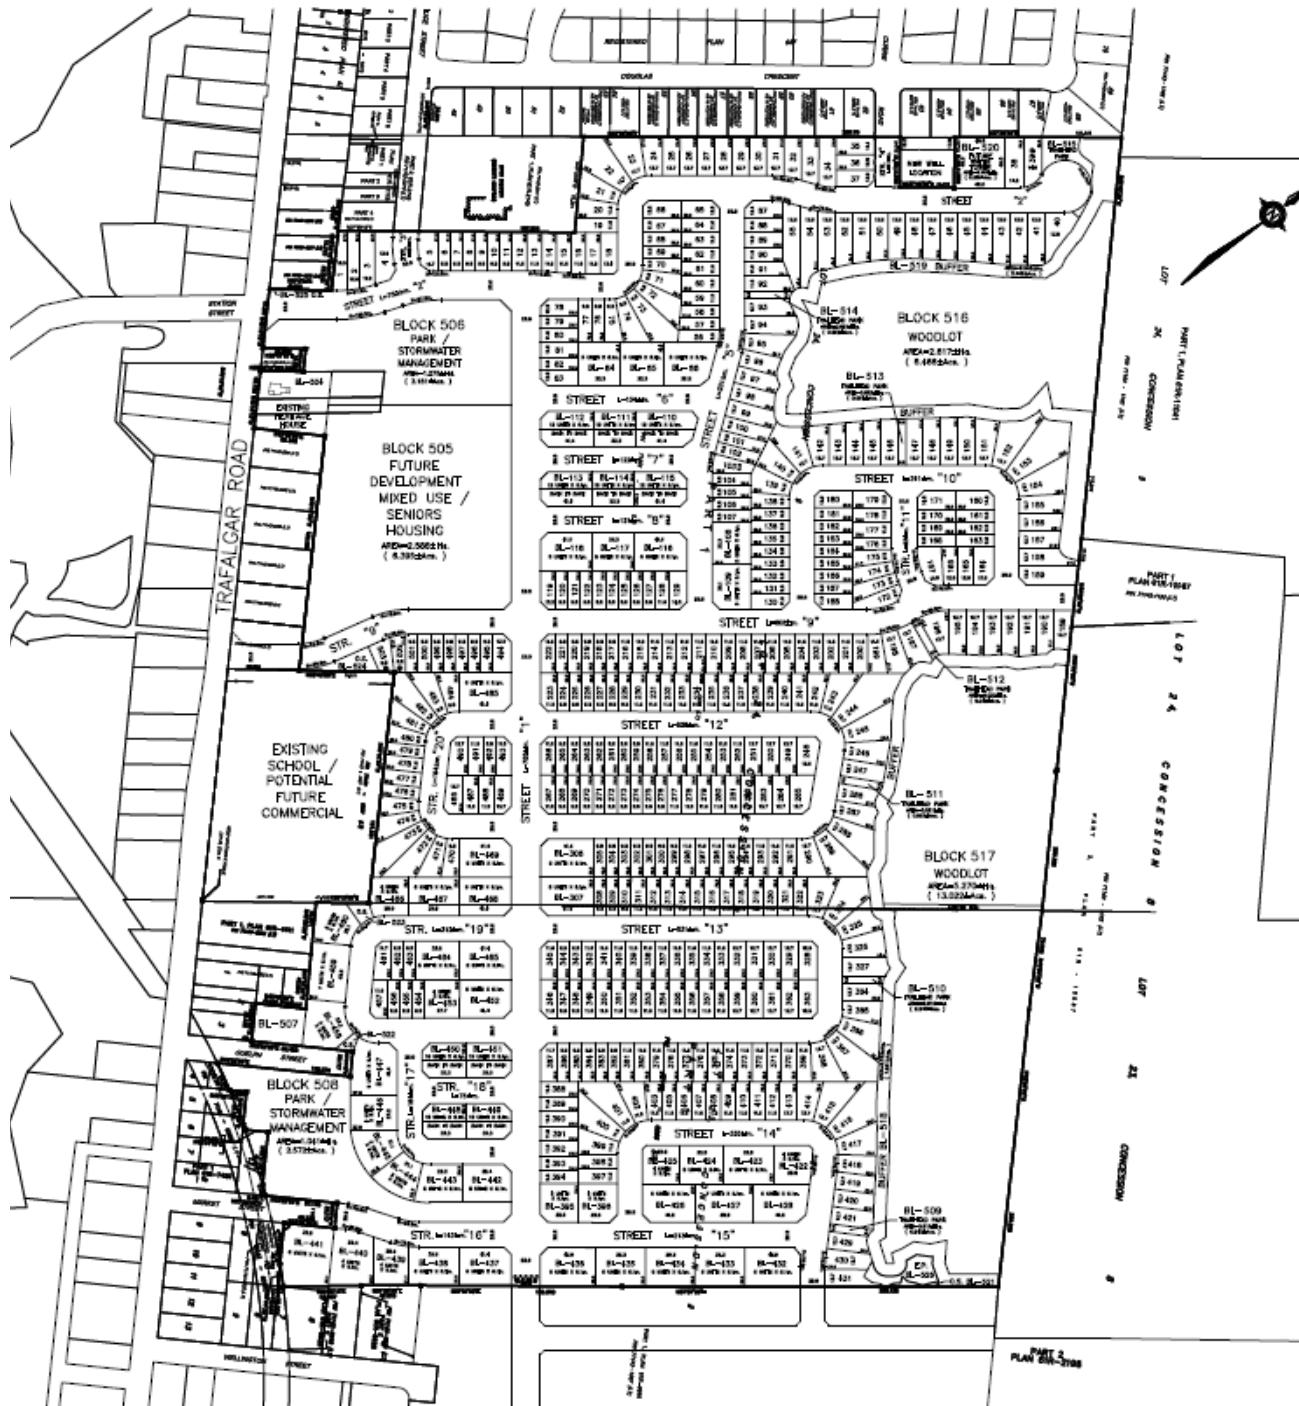

The analysis is developed for the weekday AM and weekday PM peak hours.

Transportation Study – 63 and 63A Trafalgar Road (Wellington Road 24)

Figure 2 Proposed Draft Plan of Subdivision

2.0 EXISTING AREA

2.1 Existing Roadway Conditions

A summary of the existing roadway conditions in the study area is presented below.

| | |
|---|---|
| Trafalgar Road (Wellington Road 24) | is a north-south arterial road under the jurisdictional control of the County. The roadway consists of two general-purpose lanes and maintains a posted speed limit of 40 km/h. The sidewalks along Trafalgar Road (Wellington Road 24) within the study area are not continuous. |
| Wellington Road 22 | is an east-west arterial road under the jurisdictional control of the County. The roadway consists of two general-purpose lanes and maintains a posted speed limit of 70 km/h east of Trafalgar Road (Wellington Road 24) and 80 km/h west of Trafalgar Road. |
| Station Street | is an east-west collector road under the jurisdictional control of the Town. The roadway comprises of two general-purpose lanes, and sidewalks are available on the north side of the roadway near the site. |
| Market Street | is an east-west local road under the jurisdictional control of the Town. The roadway consists of two general-purpose lanes with no sidewalks. |

The *Hillsburgh Heights Inc. Traffic Impact Study*, which was completed in November 2021, pertains to a site that is located immediately west of Trafalgar Road (Wellington Road 24) and approximately two kilometers north of Wellington Road 22. The study notes that Full Build conditions of the proposed residential subdivision development are expected to occur in 2026. In addition, the study takes into account background development trips from Carson Reid Homes Ltd, Thomasfield Homes Ltd., and Chantler, which are located in the vicinity of the site. This transportation study analysis includes trips generated by the proposed development as well as the background developments.

The Town of Erin's Official Plan proposes a minor collector road that will link Trafalgar Road (Wellington Road 24) to Wellington Road 22 and will pass through the proposed subdivision. The *Hillsburgh Heights Inc. Traffic Impact Study* referred to this new collector road as the "East Collector Road", which the study expects to be built by their 2026 horizon year. This new collector road has been included in the analysis.

According to the pre-consultation meeting with Town officials, the Town is currently developing an expansion plan for the Barbour Fields Sports Plex (approximately 66 acres), situated east of the subject site. The proposed Draft Plan of Subdivision exhibits the roadway connections between the two locations. This transportation study analysis includes the trips generated by proposed fields expansion.

2.2 Intersection Geometry

Wellington Road 22 & Trafalgar Road (Wellington Road 24) is a signalized intersection. The eastbound and westbound approaches consist of a single lane. The northbound and southbound approaches consist of a left-turn lane and a shared through-right lane.

Trafalgar Road (Wellington Road 24) & Station Street is a stop-controlled T-intersection. All approaches consist of a single lane.

Trafalgar Road (Wellington Road 24) & Market Street is a stop-controlled T-intersection. All approaches consist of a single lane.

Street “1” is proposed to be a full access connection to the proposed East Collector Road at Wellington Road 22. The East Collector Road will be located approximately 350 metres east of Trafalgar Road (Wellington Road 24).

Street “2” is proposed to be a full access connection to Trafalgar Road (Wellington Road 24). It is located approximately one kilometre north at Wellington Road 22 and will constitute the fourth leg of the existing Trafalgar Road (Wellington Road 24) & Station Street intersection.

Street “3” is proposed to be a full access connection to Spruce Street and will constitute the third leg of the Spruce Street & Douglas Crescent intersection. The conceptual draft plan suggests that the Spruce Street access connection will serve a low unit count and is in close proximity to other access points, which would result in low or insignificant traffic volumes. Consequently, this access has been excluded from the analysis.

Street “4” is proposed to be a full access connection to Currie Street and will constitute the fourth leg of the Douglas Crescent & Currie Drive intersection. Similarly, the draft plan suggests that the Currie Drive access connection will serve a low unit count and is in close proximity to other access points, which would result in low or insignificant traffic volumes. Consequently, this access has been excluded from the analysis.

Street ‘9’ is proposed to be a full access connection to Trafalgar Road (Wellington Road 24). It is located approximately 250 metres south of Station Street.

Street ‘16’ is proposed to be a full access connection to Market Street at Trafalgar Road (Wellington Road 24). It is located approximately 250 metres north of Wellington Road 22.

2.3 Transit Services

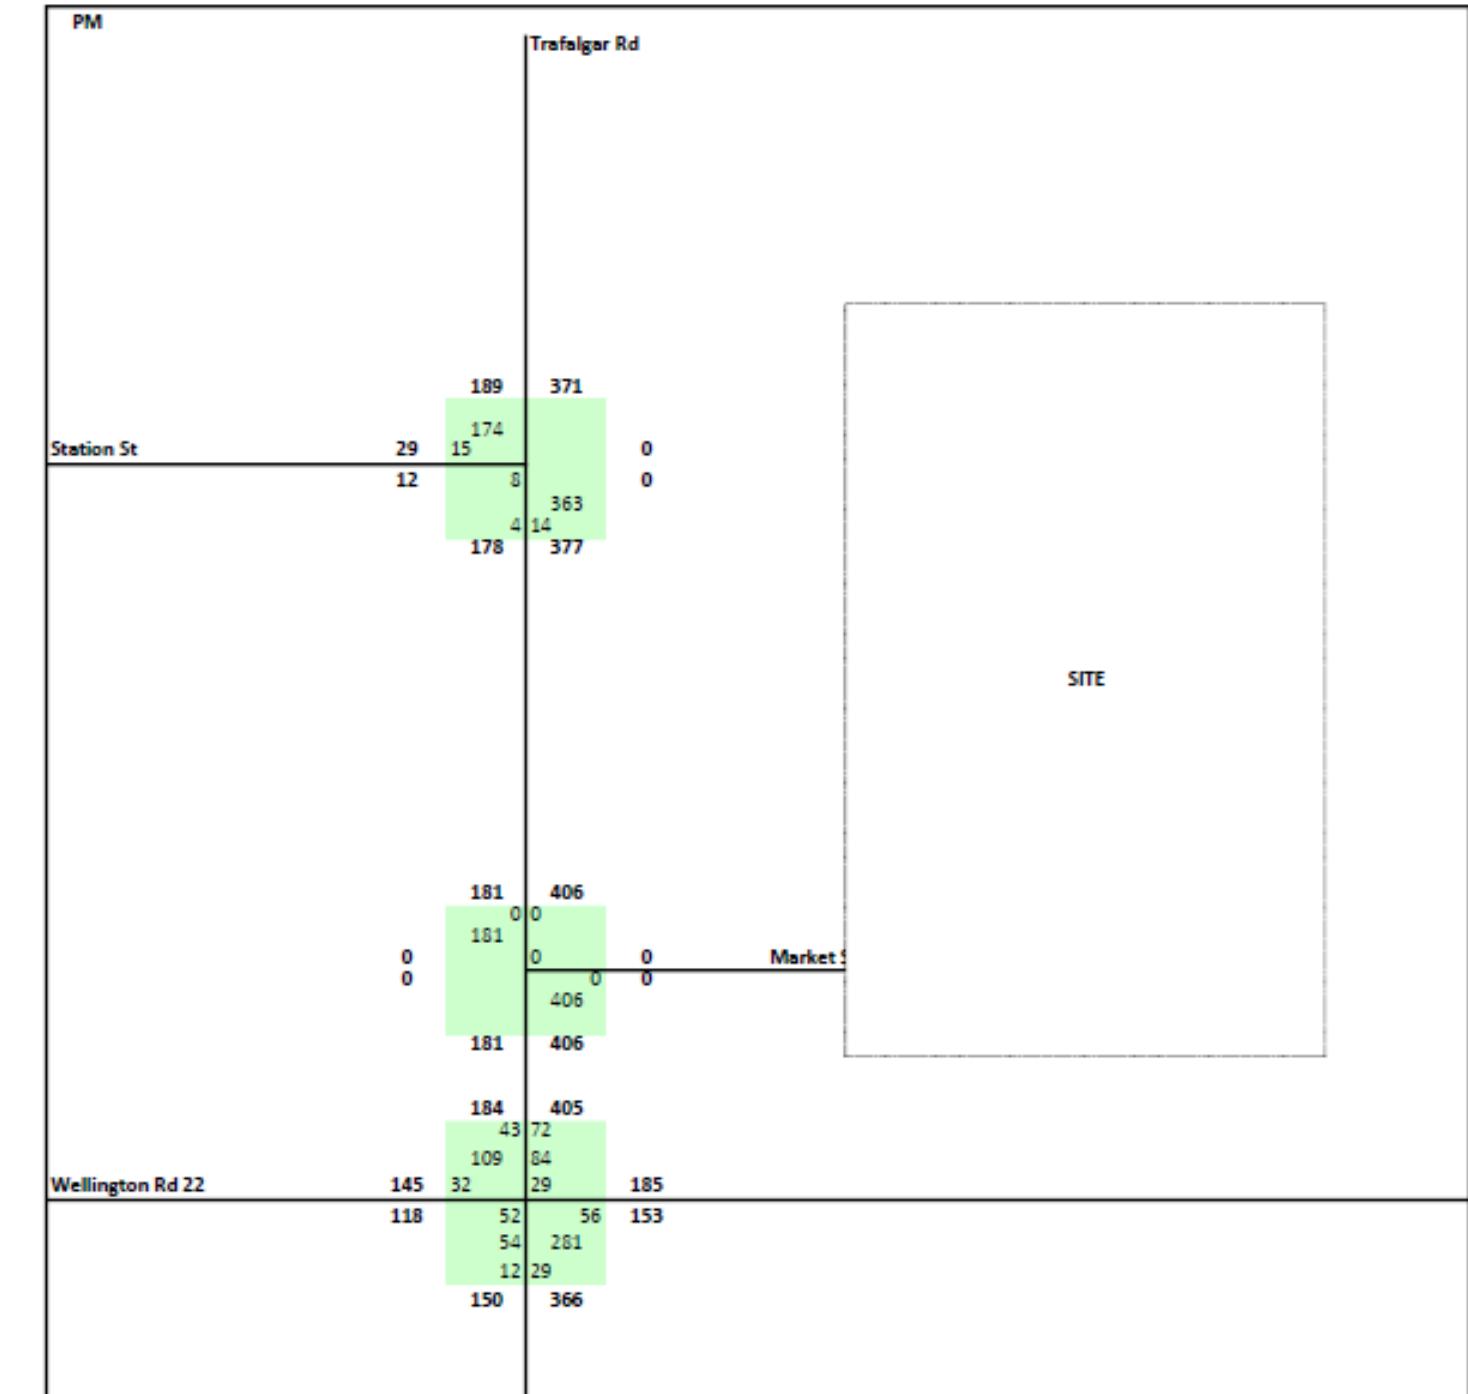

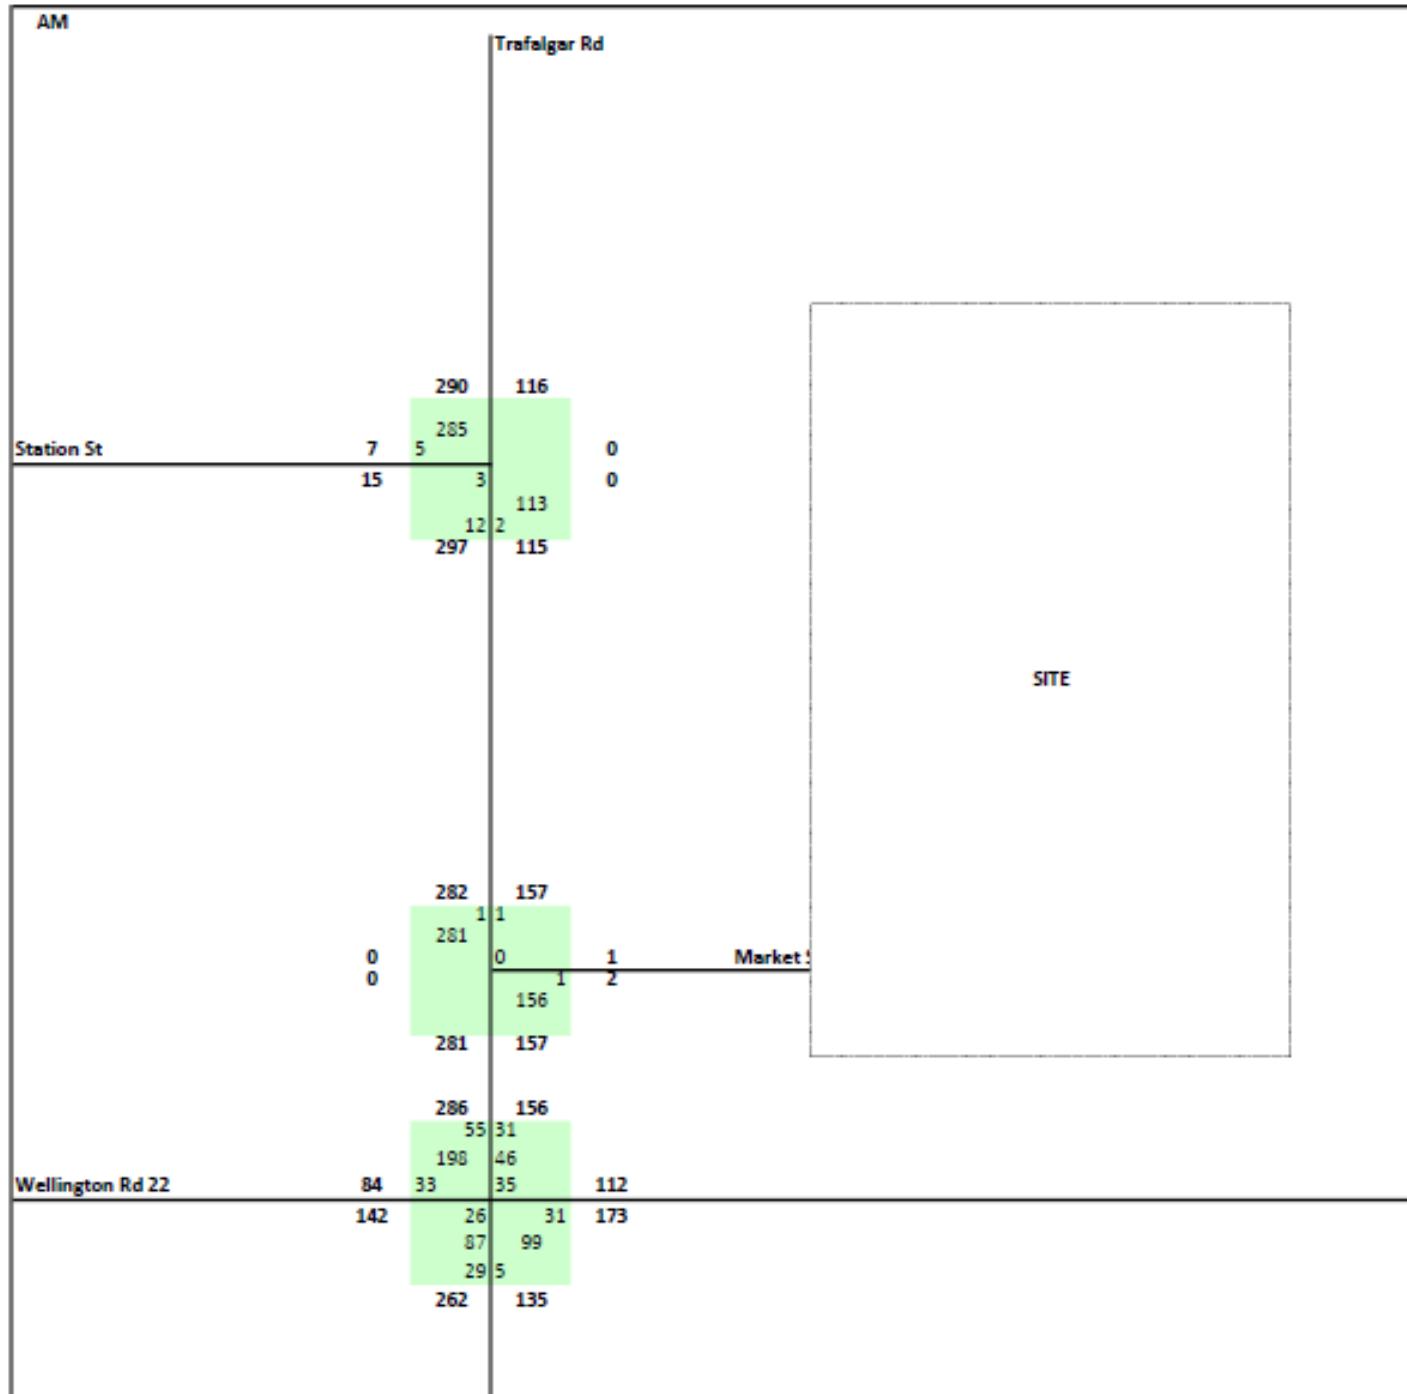

There is no transit service in the vicinity of the site.

2.4 Traffic Volumes

Traffic data collection for the study area intersections was performed on February 08, 2023. These volumes can be found in **Appendix A**.

Figure 3 displays existing traffic volumes.

Figure 3 Existing Traffic Volumes

(Not to Scale)

3.0 METHODOLOGY

3.1 Base Assumptions

Intersection capacity analysis was conducted using Synchro v11.0. Trip generation was calculated using the 11th edition of the Institute of Transportation Engineers (ITE) *Trip Generation Manual*.

Turn lane requirements were examined using the Transportation Association of Canada's (TAC) *Geometric Design Guide for Canadian Roads* as well as the *Geometric Design Standards for Ontario Highways by the Ministry of Transportation, Ontario*.

The signal timing plans for the Wellington Road 22 & Trafalgar Road (Wellington Road 24) intersection were retrieved from the *Hillsburgh Heights Inc Traffic Impact Study*.

3.2 Background Growth

As stated in the *Hillsburgh Heights Inc. Traffic Impact Study*, the County provided an annual growth rate of 2% for Trafalgar Road (Wellington Road 24) and Wellington Road 22. For a consistent analysis, the study increased the existing traffic volumes by 2% each year to approximate the background growth for future year conditions.

3.3 Background Trips

The study accounts for the development trips of Hillsburgh Heights Inc, Carson Reid Homes Ltd, Thomasfield Homes Ltd, and Chantler Properties, all located near the site. Trips generated from these developments were obtained from the the *Hillsburgh Heights Inc Traffic Impact Study*.

The Barbour Field Multi-Use Community Centre conceptual plan includes a public park with various facilities, such as ball fields, basketball courts, soccer fields, picnic areas, dog parks, ice pads, and more, covering approximately 66 acres. In order to estimate the projected trips that the centre will generate, the *ITE Trip Generation Manual, 11th Edition*, was utilized and the results have been included in the analysis. The trip generation graphs are also included in the appendices for reference.

3.4 Site Trip Generation

The development is proposed to consist of 445 single-family detached units, 353 townhouse units and one heritage house. For a conservative analysis, the heritage house was included in the trip generation calculations. The *ITE Trip Generation Manual, 11th Edition* was used to estimate the projected trips by this development. Table 1 below contains the summary of the land uses and sizes used for trip generation estimates.

Table 1 Estimated Traffic Generation

| Land Use | IV | Size | AM Peak Hour | | Entry Split% | Exit Split% | Total | | | |
|--|----------------|------|--|---------------|--------------|-------------|------------|--|--|--|
| | | | Method | Rate/Equation | | | | | | |
| 220 - Multifamily Housing (Low-Rise) - Not Close to Rail Transit | Dwelling Units | 357 | Best Fit (LIN) $T = 0.31(X) + 22.85$ | 32 | 102 | 76% | 134 | | | |
| | | | | 24% | 76% | | | | | |
| 210 - Single-Family Detached Housing | Dwelling Units | 443 | Best Fit (LOG) $\ln(T) = 0.91\ln(X) + 0.12$ | 72 | 217 | 75% | 289 | | | |
| | | | | 25% | 75% | | | | | |
| Total | | | | | | | 423 | | | |
| PM Peak Hour | | | | | | | | | | |
| 220 - Multifamily Housing (Low-Rise) - Not Close to Rail Transit | Dwelling Units | 357 | Best Fit (LIN) $T = 0.43(X) + 20.55$ | 110 | 64 | 37% | 174 | | | |
| | | | | 63% | 37% | | | | | |
| 210 - Single-Family Detached Housing | Dwelling Units | 443 | Best Fit (LOG) $\ln(T) = 0.94\ln(X) + 0.27$ | 254 | 149 | 37% | 403 | | | |
| | | | | 63% | 37% | | | | | |
| Total | | | | | | | 577 | | | |

3.5 Trip Distribution

Trips for this proposed development were assigned to the surrounding roadway network based on existing traffic patterns and surrounding land uses.

The proposed trip distribution for this project is:

- 35% to/from north of Trafalgar Road (Wellington Road 24)
- 35% to/from south of Trafalgar Road (Wellington Road 24)
- 15% to/from east of Wellington Road 22
- 15% to/from west of Wellington Road 22

The project site trips are shown in **Figure 4**. Future Background volumes for 2031 are shown in **Figure 5**. Future Total 2031 volumes are shown in **Figure 6**. Future Year 2036 volumes are shown in **Figure 7**.

4.0 TURN LANE/ACCESS MANAGEMENT

4.1 Right-Turn Lanes

The TAC *Geometric Design Guide for Canadian Roads* recommends the use of an exclusive right-turn lane when the volume of decelerating or accelerating vehicles compared with the through traffic volume causes undue hazard.

In general, an exclusive right-turn lane may be considered when the volume of right-turning vehicles is between 10 to 20 percent of the through volume, subject to a minimum of 60 vehicles per hour in the design hour.

Table 2 shows the Full Build 2031 and Future Year 2036 volumes used in the analysis.

Table 2 Right-Turn Lane Analysis

| Intersection | Horizon | Approach | AM Volume | | | PM Volume | | | Hourly Threshold | Threshold met? |
|------------------------------------|---------|----------|-----------|-------|------|-----------|-------|------|------------------|----------------|
| | | | Thru | Right | % RT | Thru | Right | % RT | | |
| Wellington Rd & East Collector Rd | 2031 | WB | 165 | 34 | 21% | 332 | 116 | 35% | 60 | Yes |
| | 2036 | | 179 | 34 | 19% | 354 | 116 | 33% | 60 | Yes |
| Trafalgar Rd & Market St / St "16" | 2031 | NB | 217 | 19 | 9% | 588 | 63 | 11% | 60 | Yes |
| | 2036 | | 236 | 19 | 8% | 637 | 63 | 10% | 60 | Yes |
| Trafalgar Rd & St "9" | 2031 | NB | 250 | 9 | 4% | 582 | 32 | 6% | 60 | No |
| | 2036 | | 269 | 9 | 3% | 631 | 32 | 5% | 60 | No |
| Trafalgar Rd & Station St/ St "2" | 2031 | NB | 212 | 9 | 4% | 476 | 32 | 7% | 60 | No |
| | 2036 | | 226 | 9 | 4% | 521 | 32 | 6% | 60 | No |

Analysis shows that based on both Full Build 2031 and Future Year 2036 volumes, minimum thresholds are met for a right-turn lane from Wellington Road 22 at the proposed East Collector Road and from Trafalgar Road (Wellington Road 24) at Market Street/ Street "16". However, capacity analysis shows that the right-turn lanes are not operationally required (See Section 5.0). As such, right-turn lanes from Trafalgar Road (Wellington Road 24) and Wellington Road 22 are not recommended.

4.2 Left-Turn Lanes

The warrant for left turn lanes was based on *Chapter E, Section E.B.1 of the Geometric Design Standards for Ontario Highways by the Ministry of Transportation, Ontario* for 2-lane undivided roadways.

Table 3 shows the Full Build 2031 and Future Year 2036 volumes used in the analysis.

| Table 3 Left-Turn Lane Analysis | | | | | | |
|------------------------------------|------|----------|------------------|-----------------|---------------|----------------|
| Full Build 2031 Volumes | | | | | | |
| Driveway | Peak | Approach | Advancing Volume | Opposing Volume | Left-Turn Vol | Threshold met? |
| Wellington Rd & East Collector Rd | AM | EB | 329 | 199 | 34 | No |
| | PM | | 331 | 448 | 116 | Yes |
| Trafalgar Rd & Market St / St "16" | AM | SB | 444 | 236 | 16 | No |
| | PM | | 329 | 651 | 53 | Yes |
| Trafalgar Rd & St "9" | AM | SB | 432 | 259 | 16 | No |
| | PM | | 366 | 614 | 55 | Yes |
| Trafalgar Rd & Station St/ St "2" | AM | SB | 400 | 240 | 11 | No |
| | PM | | 383 | 545 | 41 | Yes |
| Full Build 2031 Volumes | | | | | | |
| Wellington Rd & East Collector Rd | AM | EB | 350 | 213 | 34 | No |
| | PM | | 350 | 470 | 116 | Yes |
| Trafalgar Rd & Market St / St "16" | AM | SB | 479 | 255 | 16 | No |
| | PM | | 351 | 700 | 53 | Yes |
| Trafalgar Rd & St "9" | AM | SB | 467 | 278 | 16 | No |
| | PM | | 388 | 663 | 55 | Yes |
| Trafalgar Rd & Station St/ St "2" | AM | SB | 435 | 254 | 11 | No |
| | PM | | 406 | 591 | 41 | Yes |

Analysis shows that based on both Full Build 2031 and Future Year 2036 volumes, minimum thresholds are met for left-turn lanes from Wellington Road 22 and Trafalgar Road (Wellington Road 24) at the study area intersections. However, the capacity analysis shows that the left-turn lanes are not operationally required (See Section 5.0). As such, left-turn lanes from Trafalgar Road (Wellington Road 24) and Wellington Road 22 to the property access connections are not recommended.

4.3 Intersection/Decision Sight Distance

Minimum sight distance requirements were evaluated based on the guidelines provided in the Transportation Association of Canada's *Geometric Design Guide for Canadian Roads, Chapter 9, Intersections* (2017). The sight distance evaluation was conducted using a design speed of 80 km/h on 2nd Line and 50 km/h on Coles Crescent.

$$ISD = 0.278 V_{\text{major}} t_g \quad (9.9.1)$$

Where:

ISD = intersection sight distance (length of the leg of sight triangle along the major road) (m)

V_{major} = design speed of the major road (km/h)

t_g = time gap for minor road vehicle to enter the major road (s)

| Design Vehicle | Time Gap (t_g)(s) at Design Speed of Major Road |
|-------------------------------------|---|
| Passenger car | 7.5 |
| Single-unit truck | 9.5 |
| Combination truck (WB 19 and WB 20) | 11.5 |
| Longer truck | To be established by road authority |

The calculated intersection sight distance using the above formula and parameters results in the following:

- Passenger vehicle
 - $0.278*80*7.5 = 167$ metres
 - $0.278*50*7.5 = 105$ metres

Table 4 summarized the minimum sightline requirements and the proposed sightline distance at the proposed accesses.

Table 4 Sightline Distance Review

| Intersection | Speed | | Decision Sightline | | |
|------------------------------------|---------|---------|--------------------|---------------------|-------|
| | Posted | Design | Required | Meets Requirements? | |
| | | | | North | South |
| Wellington Rd & East Collector Rd | 70 km/h | 80 km/h | 167 m | Yes | Yes |
| Trafalgar Rd & Market St / St "16" | 40 km/h | 50 km/h | 105 m | Yes | Yes |
| Trafalgar Rd & St "9" | 40 km/h | 50 km/h | 105 m | Yes | Yes |
| Trafalgar Rd & Station St/ St "2" | 40 km/h | 50 km/h | 105 m | Yes | Yes |

5.0 INTERNAL FUNCTIONAL DESIGN STUDY

As mentioned, following the review of this transportation study report, a transportation functional design study will be completed in support of the Draft Plan of Subdivision approval. The report will document the design requirements for the internal road network and transportation elements for the proposed development.

The functional design study will include the following elements and will be informed by the *Design Criteria for the Township of Mono* (1992), *Geometric Design Guide for Canadian Roads* (TAC), the *Ontario traffic Manual*, among others:

- Internal Road Classification (ROW, Driveway Dimensions etc) and Hierarchy
- Internal Design Elements such as Curb Radii, Sight Daylight Triangles, Intersection spacing and horizontal curves.
- Potential Roundabout Locations
- Potential Transit Facilities Plan
- Pedestrians and Sidewalk Plan
- On-street Parking Plan
- Traffic Calming Plan and strategies
- Transportation Demand Management (TDM) plan

6.0 CAPACITY ANALYSIS

The Transportation Research Board's Highway Capacity Manual (HCM) utilizes a term "level of service" (LOS) to measure how traffic operates in intersections. There are currently six levels of service ranging from A to F. Level of Service "A" represents the best conditions and Level of Service "F" represents the worst. Synchro software was used to determine the level of service for intersections in the study area. All worksheet reports from the analyses can be found in the Appendix.

Table 6 shows the control delay per vehicle associated with LOS A through F for signalized and unsignalized intersections.

Table 5 Highway Capacity Manual Levels of Service and Control Delay

| Signalized Intersection | | Unsignalized Intersection | |
|-------------------------|---------------------------------|---------------------------|---------------------------------|
| Level of Service | Control Delay per Vehicle (sec) | Level of Service | Control Delay per Vehicle (sec) |
| A | ≤ 10 | A | ≤ 10 |
| B | $> 10 \text{ and } \leq 20$ | B | $> 10 \text{ and } \leq 15$ |
| C | $> 20 \text{ and } \leq 35$ | C | $> 15 \text{ and } \leq 25$ |
| D | $> 35 \text{ and } \leq 55$ | D | $> 25 \text{ and } \leq 35$ |
| E | $> 55 \text{ and } \leq 80$ | E | $> 35 \text{ and } \leq 50$ |
| F | > 80 | F | > 50 |

6.1 Capacity Analysis

Table 6 shows the LOS, control delay, and 95th percentile queue length for existing, future background and future years conditions.

Table 6 Intersection LOS, Delay, and Queue by Movement

| Intersection | Movement | Existing Traffic Conditions | | | | | | Background 2031 Traffic Conditions | | | | | | Total 2031 Traffic Conditions | | | | | | Total 2036 Traffic Conditions | | | | | | | | | | | | | |
|---|----------|-----------------------------|--------|----------------|--------------|-------|--------|------------------------------------|-----|-------|--------------|----------------|-----|-------------------------------|--------|----------------|--------------|-------|--------|-------------------------------|-----|-------|--------------|----------------|-----|-------|------|------|---|-------|------|-------|---|
| | | AM Peak Hour | | | PM Peak Hour | | | AM Peak Hour | | | PM Peak Hour | | | AM Peak Hour | | | PM Peak Hour | | | AM Peak Hour | | | PM Peak Hour | | | | | | | | | | |
| | | V/C | Delays | Queue 95th (m) | LOS | V/C | Delays | Queue 95th (m) | LOS | V/C | Delays | Queue 95th (m) | LOS | V/C | Delays | Queue 95th (m) | LOS | V/C | Delays | Queue 95th (m) | LOS | V/C | Delays | Queue 95th (m) | LOS | | | | | | | | |

6.1.1 Wellington Road 22 & Trafalgar Road (Wellington Road 24)

Analysis shows that the intersection is projected to experience significant delays for the westbound approach in both background and future year conditions. Similar to the observations of the *Hillsburgh Heights Inc Traffic Impact Study*, modified signal timing plans improve the intersection operations.

6.1.2 Wellington Road 22 & East Collector Road/Street “1”

Analysis shows that the proposed East Collector Road at Wellington Road 22 is expected to operate acceptably in both background and future year conditions without the requirements of auxiliary turning lanes. It is recommended that the proposed East Collector Road be implemented by year 2031.

6.1.3 Trafalgar Road (Wellington Road 24) & Station Street/ Street “2”

Analysis shows that acceptable levels of service are maintained with the 2031 Full Build development traffic as well as Future Year 2036 Conditions without the requirements of auxiliary turning lanes.

6.1.4 Trafalgar Road (Wellington Road 24) & Street “9”

Analysis shows that Street “9” connection to Trafalgar Road (Wellington Road 24) is expected to operate acceptably with the 2031 Full Build development traffic as well as Future Year 2036 conditions without the requirements of auxiliary turning lanes.

6.1.5 Trafalgar Road (Wellington Road 24) & Market Street/ Street “16”

7.0 CONCLUSIONS

This study serves as an analysis of the traffic impacts from the proposed Draft Plan of Subdivision situated on a parcel of land located on the east side of Trafalgar Road (Wellington Road 24), north of Wellington Road 22, in the Town of Erin, County of Wellington.

This analysis was necessary to determine the impacts on and improvements required to accommodate the additional traffic volumes which will be generated by proposed Draft Plan of Subdivision consisting of 445 single-family detached units, 353 townhouse units and one heritage house.

Trip Generation

The proposed new development is expected to generate 104 entering and 319 exiting trips in the AM peak hour, and 364 entering and 213 exiting trips in the PM peak hour.

Turn Lanes

Analysis shows that projected volumes at the proposed accesses meet thresholds for right-turn and left-turn lanes, however, capacity analysis shows they are not operationally required at future year 2036 conditions.

Traffic Impacts

Analysis shows that acceptable LOS will be maintained on all approaches at all intersections for the 2036 future year traffic volumes except for the Wellington Road 22 & Trafalgar Road (Wellington Road 24) intersection. **It is recommended that the signal timing plan be modified to improve operations.**

Internal Functional Design Study

A transportation functional design study will be completed in support of the Draft Plan of Subdivision approval. The report will document the design requirements for the internal road network and transportation elements for the proposed development.
