ERIN VILLAGE GRAVITY SEWER CONSTRUCTION PROGRESS

Contract: 2022-04W

The installation of microtunneling shafts for the sanitary gravity sewer along Main Street in Erin Village is currently in progress. Construction is ongoing on Dundas Street East, as well as on Main Street at Scotch Street and in front of the Erin Plaza. For the safety of workers, road users and pedestrians, road closures are in place on affected local roads, and access to and from the Erin Plaza to Main Street will be temporarily closed during construction. Access to the Erin Plaza will only be available via Church Boulevard. See the map posted on the back of this notice for details.

Utility relocation work required for the construction of the gravity sewer is ongoing at the intersection of Main Street and Lorne Street and on Water Street, and will commence at the Elora Cataract Trail intersection in the coming weeks.

A detour route has been established to bypass the road closure on Dundas Street East, via Pine Street and Daniel Street. All vehicular traffic must adhere to the posted speed limits on local roads. As a result of the increased traffic, street parking will be prohibited along the detour route for the safety of pedestrians.

Two-way traffic flow will be maintained on Main Street with road jogs implemented as necessary to accommodate shaft construction. Access to local homes, businesses and emergency services will be maintained at all times.

Construction Start: July 2023
Anticipated Completion: October 2024

**Timeline is subject to change.*

MORE INFORMATION AND CONSTRUCTION UPDATES

We apologize for any inconvenience caused and thank you for your cooperation and patience as we work to improve the infrastructure in Erin Village. The Town and their Contractor will make every effort to minimize impacts to the community during construction. **Local businesses will remain open and accessible throughout the construction period.**
